

## **MOVING-IN**

Prior to moving in you must inform us of your intended move-in time and date (if not the first day of tenancy). A member of our team will meet you at the property to hand over your keys, carry out inventory, inform you of fire safety procedures and other general information about the property. In the weeks leading up to your tenancy start-date, an email will be sent from our team to begin arranging the move-in process.
